

# ATTENTION:

## Property Owners Affected by the Tubbs Fire in Sonoma County or the Redwood Fire in Mendocino County

**ALERT:** You are responsible for installing and maintaining erosion controls to prevent sediment and other pollutants from leaving your property when it rains and during the rebuilding process.

**Russian Riverkeeper is here to help you meet that requirement at NO COST to you.**

The County of Sonoma, Sonoma Clean Power and the Rose Foundation for Communities and Environment have provided funding to Russian Riverkeeper and our partner Clean River Alliance to provide you with experienced, certified design services and free installation of erosion, sediment, and ash contamination control devices. Once your lot is cleared of debris and the soil sample is acceptable you are required by local city and county ordinances to ensure your property is fully protected from erosion in future rain events.

If you would like proven products, trusted, certified, and insured design and service providers to help you protect your property from sediment/erosion migration (on to or off of) please contact us via the email below with the following information and we will get your property covered and ready for rain.

Name: \_\_\_\_\_

Property Address: \_\_\_\_\_

Property cleared? Yes: \_\_\_\_\_ No: \_\_\_\_\_ If no, do you know the date it will be scheduled? \_\_\_\_\_

Soil tested? Yes: \_\_\_\_\_ No: \_\_\_\_\_ If no, do you know the date it will be scheduled? \_\_\_\_\_

Mobile Phone: \_\_\_\_\_ Email address: \_\_\_\_\_
